This Scraper currently only scrapes links out of the public AI Papers You Should Read channel.

There is no off button for the midi and I am sorry.

In the backend:
-pull URLS
-make JSON
-make title
-make PDF

The GUI will let you pull links (40-60 second wait)
And Download a PDF with titles (1-2 min wait for download)

HOW TO USE

In **main.py** **REPLACE** the **ELEMENT(OR OTHER) TOKEN** with your **new token** that will expire in like half a day or whatever.

ACCESS_TOKEN = "blah blah blah" # ← Replace this manually

```
22
23    MATRIX_HOMESERVER = "https://matrix.org"
24    USERNAME = "@spenc3r:matrix.org"
25    ACCESS_TOKEN = "mat_i7FqI8nPZissghCr5cjG8cWpGgMS0f_DYeW01"  # <-- Replace this
      manually
26
27    LINK_REGEX = r"(https?://[^\s]+)"
28    💡                                                      Generate ⌘ I
29  ∨ def fetch_title(url):
```
